

Global experts on renewable energy and carbon reduction

At 3Degrees, we make it possible for businesses and their customers to take urgent action on climate change. We develop custom renewable energy and climate solutions to meet our clients at every step of their sustainability journey.

When we were founded, 3° was often cited as a possible tipping point for climate change. Now there is a focus on limiting the increase in global temperatures to below 2°. While the specific target may change, our name is a strong reminder of the importance of our mission.

CASE STUDIES

Global Capabilities

- + GOs, TIGRs, RECs, I-RECs
- + International & Domestic Carbon Offsets
- + Onsite renewable energy sources
- + Retail supply
- + Physical & virtual PPA

Consulting Services

- + Energy assessments
- + Scenario planning
- + Goal setting
- + Implementation services
- + Disclosure and reporting
- + Scope 3 action plans

DUTCH WIND CONSORTIUM

Four multinational corporations partnered to secure long-term renewable energy by executing PPAs from off-shore wind projects in the Netherlands. 3Degrees is working with the DWC to bring in corporate partners who support their efforts by buying long-term GO contracts from new projects. By working together, we can help bring down costs for all participants.

LYFT

Lyft, the global ride-hailing service, has an aggressive environmental goal to offset emissions from all Lyft rides worldwide. They partnered with 3Degrees to design a program that would both meet their short-term goals and have the flexibility to evolve and grow with Lyft's business. The program uses carbon offsets as a tool to fund emission reduction projects that result in tangible changes in the way parts of the transportation sector operate. The program is also funding projects that help address other environmental impacts from vehicle use, such as water and non-climate air emissions.

CONSUMER TECHNOLOGY LEADER - CONFIDENTIAL CLIENT

This global leader in consumer technology is committed to ambitious renewable energy goals and wanted a strategy to address their Scope 3 emissions by helping their suppliers worldwide adopt renewable energy. 3Degrees created a scenario planning tool to reflect a hierarchy of renewable energy procurement options to determine viability and impact across 4 countries. In addition, we drafted the client's first country-specific guides to renewable purchasing and translated the guides into three languages.

“

“The team from 3Degrees has been instrumental in helping us set goals, develop a strategy and implement projects. With their help we have been able to find new ways to invest in renewable energy that meet our business objectives.”

DR. NICOLA PEILL-MOELTER

Senior Director of Environmental Sustainability, Akamai

“3Degrees' ability to develop unique emission reduction projects with a high level of environmental integrity made them a natural fit for us. Their depth of experience, analytical rigor, and creativity helped us craft a program that can change over time and as our needs evolve.”

SAM ARONS

Director of Sustainability, Lyft

Focused on our clients' success

- + We work with companies of all sizes looking to meet SDGs 7 and 13 by addressing some or all of their global Scope 1, 2 and 3 greenhouse emissions.
- + Our work spans all stages of the sustainability journey from initial assessments and goal setting to more complex renewable energy and carbon transactions.
- + As a team of sustainability experts, renewable energy developers, wholesale energy market experts, engineers, scientists and financiers, we bring unparalleled experience to our customers.
- + Our depth of knowledge enables us to distill and tame a complex, chaotic world into actionable opportunities for our clients.
- + We help clients identify the right opportunities to strengthen their relationships with stakeholders, while minimizing cost and risk.

Global Clients Include:

3DEGREES BY THE NUMBERS:

Founded 2007

*1.8 GWs of
renewable power
transactions
completed*

*120 million GOs
and RECs delivered
to clients*

*8.8 million
verified carbon
credits delivered*

*60 countries
where we buy,
sell or consult
on clean energy*

The 17 UN Sustainable Development Goals (SDGs), finalized in 2015, provide a framework for thinking about - and tackling - the world's most pressing sustainability challenges. At 3Degrees, we have organized our products and services around helping our clients address SDG 7 (affordable and clean energy) and SDG 13 (climate action) in their own businesses and throughout their supply chain.
