

# Renewable Energy Procurement Services

## *Interested in purchasing renewable energy?*

3Degrees can help you to define renewable energy needs, develop a customized strategy based on your needs and priorities, identify renewable energy procurement opportunities, and match your objectives with projects from our network of development partners and suppliers. And we can be there the entire way – from analyzing your energy use to negotiating the final transaction.

## WE SIMPLIFY THE PROCESS

# We Simplify the Process

## 3Degrees will:

- + Assess your company's needs, goals and constraints.
- + Develop a customized, sustainable energy procurement plan.
- + Leverage our unrestricted network of suppliers to identify opportunities to carry out that plan.
- + Fully support you through the procurement process, from evaluation and selection of the options to contract execution with the optimal set of projects.
- + Communicate the environmental and economic impacts to your stakeholders.

## Why 3Degrees?

### MARKET EXPERIENCE

With more than 10 years in the market, our team understands -- and can work through -- the complexities of renewable energy procurement.

### MORE PROJECTS

3Degrees provides access to an unparalleled network of the most experienced and reputable developers with capabilities to build distributed generation facilities as well as large-scale wind and solar farms. That's because our model does not require developer exclusivity, so our clients will see more opportunities suited to their specific needs.

### CUSTOMIZED SOLUTIONS

We develop tailored sustainability plans based on an intimate understanding of our client's business drivers, the policy landscape, technology preferences, and the interplay in between them.

## RENEWABLE PROCUREMENT SERVICES

*We offer a full range of services - from individual consulting services to turnkey solutions.*
