

3Degrees is your global partner for high-quality EACs

Organizations across the globe are increasing their commitments to take action on climate change. And since scope 2 emissions – indirect greenhouse gas (GHG) emissions resulting from the generation of purchased electricity consumed by an organization – typically represent over 60% of an organization’s emissions footprint, a robust plan to address these emissions is a critical component to any organization’s climate strategy.

3Degrees is a global partner to both organizations looking to address their scope 2 emissions and suppliers that can deliver high-quality energy attribute certificates (EACs) to these organizations. An EAC is official documentation that proves that 1MWh of renewable energy has been added to the energy grid.

3DEGREES BY THE NUMBERS

1,200+
clients

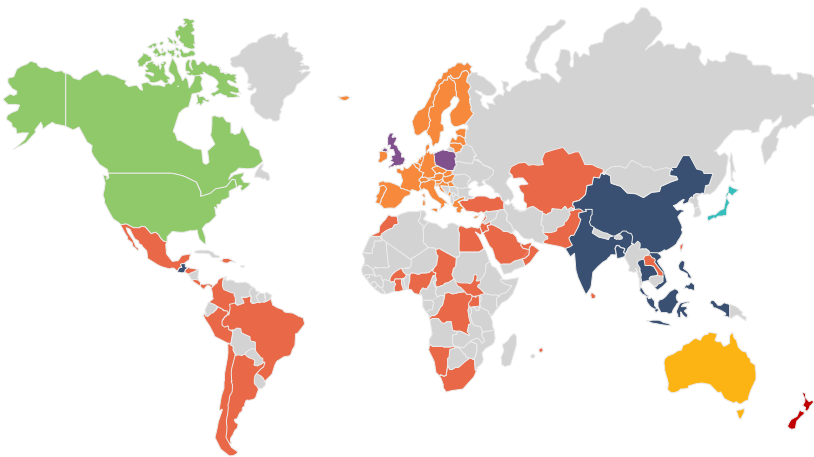

450M+
Megawatt hours of renewable energy supported across the globe

6,400+
Suppliers of environmental commodities

65+
Countries where we buy, sell, or consult on clean energy

- **RECs** (Renewable Energy Certificates)
- **I-REC** (I-REC Standard Certificate)
- **AIB GO** (AIB Guarantee of Origin)
- **Non-AIB GO or REGO** (Non-AIB Guarantee of Origin or Renewable Energy Guarantee of Origin)
- **NZECS** (New Zealand Energy Certificate System)
- **LGC** (Large-scale Generation Certificates)
- **TIGRs and I-REC**
- **T-RECS and I-REC**
- **J-Credit and NFCs**

At 3Degrees, our business is our mission. We make it possible for businesses and their customers to take urgent action on climate change. As a certified B Corporation, we provide renewable energy and emission reduction solutions to Fortune 500 companies, utilities, universities, green building firms, and other organizations. Headquartered in San Francisco, 3Degrees serves clients around the world. To learn more, visit [3degrees.com](https://www.3degrees.com).
