

BIOGAS

Biogas is methane generated from:

+ Decomposition of wet organic waste.

Anaerobic digesters at:

food processing plants

farms (Using crop and/or manure)

wastewater treatment plants

+ Gas collection systems at landfills

BIOMETHANE

Biomethane is cleaned or “upgraded” biogas, it is a climate-friendly alternative to fossil/geologic natural gas.

Synonyms: Renewable natural Gas (RNG), high BTU biogas

GREEN GAS CERTIFICATES

Green Gas Certificates are the environmental attributes associated with biomethane.

Synonyms: Thermal RECs, Biomethane Certificates, Renewable Gas Guarantee of Origin (RGGO), Renewable Thermal Certificates (RTCs), RNG Certificates

CONNECT WITH US

3Degrees is a leading global climate solutions provider and Certified B Corporation. We offer impactful climate solutions that help our clients achieve their climate goals and advance an equitable transition to the low-carbon future. Learn more at 3degrees.com.
