

The disclosures in this document reflect 3Degrees' interpretation of AB-1306's requirements.

All credits sold and marketed by 3Degrees are validated and verified by an independent third-party.

Last updated January 1, 2025 For current information about 3Degrees' available carbon credits, please contact us [here](#).

Project Name	Standard	Methodology	Project Type	Project Location	Project Timeline	Project Start Date (MM/DD/YYYY)	Quantity of reductions/removals generated on an annual basis	Avoidance/Removal/Blend (if blend, breakdown of quantity from each)	Whether the project is independently validated and verified	Details regarding accountability measures if a project does not meet the projected emissions reductions or removal benefits, including if reversal events occur or if future emissions reductions do not materialize.	Pertinent data and calculation methods needed to independently reproduce and verify the number of credits issued	Vintage	The durability for any project where the project's greenhouse gas reductions or greenhouse gas removal enhancements is less than the atmospheric lifetime of carbon dioxide emissions.	Project Registry Page
15 MW Nam Hinboun Downstream Hydropower Project	Verified Carbon Standard	AMS I.D. Small-scale methodology for grid-connected renewable electricity generation, Version 18	Small, Low-Impact Hydro	Laos	2/1/2021 - 1/31/2028	02/01/2021	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2021-2022	Permanent	VCS3862
Alliance Dairy	Climate Action Reserve	CAR U.S. Livestock Project Protocol, Version 4.0	Agriculture Methane	Florida, United States	11/6/2014 - 11/5/2024	01/01/2013	Please reference the project's registry page and the Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2021-2022	Permanent	CAR1582
AMC Maine Woods Initiative	American Carbon Registry	Improved Forest Management (IFM) on Non-Federal U.S. Forestlands, Version 1.3	Forestry - Sustainable Management	Maine, United States	07/22/2020 - 07/22/2040	07/22/2020	Please reference the project's registry page and the project's Verification Options for historical annual issuances.	The project generates both avoidance and removals. 3Degrees is marketing both avoided emissions and removals credits from this project. For a breakdown of the project's avoidance and removal credits, please reference the project's verification opinions.	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Details on accountability measures can be found in the American Carbon Registry Standard, available here . In the event of an unintentional reversal, this project is subject to American Carbon Registry's Buffer Pool requirements, found in Chapter 5 of the Standard. All transactions are ex-post. For additional information, please reference the project's registry page.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2021-2022	In accordance with the Protocol, the project is required to maintain the project scenario for a 40 year term. For additional information, please reference the project's registry page.	ACR571
Anew - Boone Forestry Project	American Carbon Registry	ACR Improved Forest Management on Non-Federal U.S. Forestlands, Version 1.3	Forestry - Sustainable Management	Kentucky, United States	10/19/2019 - 10/18/2039	04/20/2021	Please reference the project's registry page and the Verification Options for historical annual issuances.	The project generates both avoidance and removals. 3Degrees is marketing only removals credits from this project. For a breakdown of the quantity beyond what 3Degrees is marketing, please reference the project's registry page.	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Details on accountability measures can be found in the American Carbon Registry Standard, available here . In the event of an unintentional reversal, this project is subject to American Carbon Registry's Buffer Pool requirements, found in Chapter 5 of the Standard. All transactions are ex-post. For additional information, please reference the project's registry page.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2020	In accordance with the Protocol, the project is required to maintain the project scenario for a 40 year term. For additional information, please reference the project's registry page.	ACR596
Blue Creek	American Carbon Registry, CARB	ARB, US Forest Projects, Version November 2014	Forestry - Sustainable Management	California, United States	03/19/2015 - 03/19/2040	03/19/2015	Please reference the project's registry page and the project's Verification Options for historical annual issuances.	The project generates both avoidance and removals. 3Degrees is marketing only removals credits from this project. For a breakdown of the quantity beyond what 3Degrees is marketing, please reference the project's registry page.	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Details on accountability measures can be found in the American Carbon Registry Standard, available here . In the event of an unintentional reversal, this project is subject to American Carbon Registry's Buffer Pool requirements, found in Chapter 5 of the Standard. All transactions are ex-post. For additional information, please reference the project's registry page.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2023	In accordance with the Protocol, the project is required to maintain the project scenario for a 40 year term. For additional information, please reference the project's registry page.	ACR282
Chaput Family Farms	Climate Action Reserve, CARB	ARB, Livestock Offset Protocol, November 14, 2014	Agriculture Methane	Vermont, United States	11/2018 - 12/31/2028	08/05/2010	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Marketing project, no saleable vintage in inventory.	Permanent	CAR1275
Clinton Landfill Gas Collection and Combustion Project	Verified Carbon Standard	ACM001, Flaring or use of landfill gas, Version 19	Landfill Gas	Illinois, United States	07/01/2019 - 06/30/2029	01/24/2007	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022	Permanent	VCS318
Conversion of SF6 To An Alternative Cover Gas In Magnesium Production In Eaton Rapids, MI and Strathroy, ON	Verified Carbon Standard	AM0065, Replacement of SF6 with alternate cover gas in the magnesium industry, Version 2.1	Fuel Switch	Michigan, United States	01/01/2017 - 12/31/2026	01/01/2007	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions will be ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022-2023	Permanent	VCS618
CPA 056 - Charcoal Stoves in Kenya	Gold Standard	AMS-II.G., Energy Efficiency Measures in Thermal Applications of Non-Renewable Biomass, Version 3	Energy Efficiency	Kenya	11/19/2011 - 11/18/2039	11/19/2011	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022	Permanent	GS11879
CPA 057 - Charcoal Stoves in Kenya	Gold Standard	AMS-II.G., Energy Efficiency Measures in Thermal Applications of Non-Renewable Biomass, Version 3	Energy Efficiency	Kenya	11/19/2011 - 11/18/2039	11/19/2011	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022	Permanent	GS11880
Empire Riverlands Forestry	American Carbon Registry	Improved Forest Management (IFM) on Non-Federal U.S. Forestlands, Version 1.3	Forestry - Sustainable Management	New York, United States	12/17/2021 - 12/17/2041	12/17/2021	Please reference the project's registry page and the project's Verification Options for historical annual issuances.	The project generates both avoidance and removals. 3Degrees is marketing only the removals credits from this project. For a breakdown of the project's avoidance and removal credits, please reference the project's verification opinions.	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Details on accountability measures can be found in the American Carbon Registry Standard, available here . In the event of an unintentional reversal, this project is subject to American Carbon Registry's Buffer Pool requirements, found in Chapter 5 of the Standard. All transactions are ex-post. For additional information, please reference the project's registry page.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022	In accordance with the Protocol, the project is required to maintain the project scenario for a 40 year term. For additional information, please reference the project's registry page.	ACR705
English Bay Forest Carbon	Climate Action Reserve, CARB	ARB, US Forest Projects, Version June 2015	Forestry - Sustainable Management	Alaska, United States	12/31/2017 - 12/30/2042	12/31/2017	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	The project generates both avoidance and removals. 3Degrees is marketing only the removals credits from this project. For a breakdown of the quantity beyond what 3Degrees is marketing, please reference the project's registry page.	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Details on accountability measures can be found in the CARB US Forest Compliance Offset Protocol, available here . In the event of a reversal, this project is subject to the Protocol's requirements for compensating reversals, found in section 3.5.3. All transactions are ex-post. For additional information, please reference the project's registry page.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022	In accordance with the Protocol, the project is required to maintain the project scenario for a 100 year term. For additional information, please reference the project's registry page.	CAR1293
FarmPower Rexville Regional Digester	Climate Action Reserve	CAR Livestock Project Protocol 4.0	Agriculture Methane	Washington, United States	8/12/2009 - 8/11/2029	08/12/2009	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Marketing project, no saleable vintage in inventory.	Permanent	CAR416
Flathead Electric Cooperative Landfill Gas to Energy Project	Verified Carbon Standard	AMS III G, Landfill Methane Recovery, Version 10	Landfill Gas	Montana, United States	6/26/2019 - 6/25/2029	06/29/2009	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022-2023	Permanent	VCS840
Foam Blowing Agent Project 001P	American Carbon Registry	Methodology for the Quantification, Monitoring, Reporting, and Verification of Greenhouse Gas Emissions Reductions and Removals from the Transition to Advanced Formulation Blowing Agents in Foam Manufacturing and Use, Version 3.0	Hydro fluoro carbons	Missouri, United States	01/01/2022 - 12/31/2041	01/01/2022	Please reference the project's registry page and the project's Verification Options for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022	Permanent	ACR833
Foam Blowing Agent Project 003H	American Carbon Registry	Methodology for the Quantification, Monitoring, Reporting, and Verification of Greenhouse Gas Emissions Reductions from the Transition to Advanced Formulation Blowing Agents in Foam Manufacturing and Use, Version 3.0	Hydro fluoro carbons	Virginia, United States	10/1/2022 - 12/31/2046	01/01/2022	Please reference the project's registry page and the project's Verification Options for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022	Permanent	ACR832
Greater Lebanon Refuse Authority Landfill Gas Collection and Combustion Project	Verified Carbon Standard	ACM001, Large-scale Consolidated Methodology: Flaring or use of landfill gas, Version 18.1	Landfill Gas	Pennsylvania, United States	4/1/2008 - 3/31/2018	09/30/2007	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	Marketing project, no saleable vintage in inventory.	Permanent	VCS5
Greenwood Dairy Anaerobic Digester	American Carbon Registry, CARB	ARB, Livestock Offset Protocol, November 14, 2014	Agriculture Methane	New York, United States	1/1/2016 - 3/31/2026	01/01/2016	Please reference the project's registry page and the project's Verification Options for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Marketing project, no saleable vintage in inventory.	Permanent	ACR355
Guoluo Grassland Sustainable Management Project	Verified Carbon Standard	VM0026, Sustainable Grassland Management, Version 1.0	Grassland Management	China	6/20/2016 - 6/19/2056	06/20/2016	Please reference the project's registry page for historical annual issuances.	Removals	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Details on accountability measures can be found in the Verified Carbon Standard, available here . In the event of an unintentional reversal, the project is subject to Vera's project buffer account, described in Section 2.4 of the Standard. All transactions are ex-post. For additional information, please reference the project's registry page.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2018	In accordance with the Protocol, the project is required to maintain the project scenario for a 40 year term. For additional information, please reference the project's registry page.	VCS2458
Hilltop Sand and Gravel Landfill GHG Project	Climate Action Reserve	CAR Landfill Project Protocol, Version 5.0/Version 6.0	Landfill Gas	Virginia, United States	11/2/2020 - 11/1/2030	11/02/2010	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2021-2023	Permanent	CAR829
Larimer County Landfill Gas Project	Climate Action Reserve	CAR Landfill Project Protocol, Version 5.0	Landfill Gas	Colorado, United States	10/26/2019 - 10/25/2029	10/24/2009	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022-2023	Permanent	CAR509
Morehead Landfill	Climate Action Reserve	CAR U.S. Landfill Project Protocol, Version 6	Landfill Gas	Kentucky, United States	12/3/2019 - 12/2/2029	12/03/2009	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022-2023	Permanent	CAR592
Nam Long Hydropower Project	Gold Standard	AMS-I.D. Grid Connected Renewable Electricity Generation, Version 18	Small, Low-Impact Hydro	Laos	10/1/2021 - 9/30/2026	07/07/2008	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2021-2023	Permanent	GS2707
Skyridge Farms Advanced Solid Separation	Verified Carbon Standard	AMS-III.Y, VMR0003, Version 1.0	Agriculture Methane	Washington, United States	10/23/2019 - 10/22/2026	10/23/2019	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2019-2024	Permanent	VCS2656
South Kent Landfill Gas to Energy Project	Climate Action Reserve	CAR U.S. Landfill Project Protocol, Version 6	Landfill Gas	Michigan, United States	7/10/2018 - 7/9/2028	07/10/2008	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2023-2024	Permanent	CAR443
Synergy Biogas	American Carbon Registry, CARB	ARB Livestock Offset Protocol, November 14, 2014	Agriculture Methane	New York, United States	12/01/2014 - 11/30/2024	12/01/2014	Please reference the project's registry page and the project's Verification Options for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Marketing project, no saleable vintage in inventory.	Permanent	ACR235
Terra Yazoo City # 9, Nitrous Oxide Abatement Project	Climate Action Reserve	CAR Nitric Acid Production Project Protocol Version 2.2	N2O Abatement	Mississippi, United States	8/12/2019 - 8/11/2029	04/16/2009	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Marketing project, no saleable vintage in inventory.	Permanent	CAR768
The RuAnn Dairy Methane Reduction Project	Climate Action Reserve, CARB	ARB, Livestock Offset Protocol, November 14, 2014	Agriculture Methane	California, United States	1/1/2024 - 12/31/2033	11/17/2022	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Marketing project, no saleable vintage in inventory.	Permanent	CAR1861
Washington Beef LLC Greenhouse Gas and Solids Reduction Project	Climate Action Reserve	CAR Organic Waste Digestion Project Protocol, Version 2.0	Agriculture Methane	Washington, United States	1/10/2013 - 1/9/2033	01/10/2013	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2023	Permanent	CAR1008
Winchester Landfill	Verified Carbon Standard	ACM001, Flaring or use of landfill gas, Version 19	Landfill Gas	Virginia, United States	9/30/2008 - 9/29/2018	09/30/2008	Please reference the project's registry page for historical annual issuances.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Please reference the project's registry page for verification reports. All emission reductions and/or removals are calculated in accordance with the Protocol.	2022-2023	Permanent	VCS833
CarbiCrete	Project is under development; standard registration pending	Project is under development; methodology selection pending.	Concrete	Canada	Project is under development; timeline is pending.	Project is under development; timeline is pending.	Project is under development; quantity of reductions and removals generated is pending.	The project will generate both avoidance and removals. 3Degrees is marketing both. Project is not yet issued and avoidance and removals breakdown is not yet known.	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	If a reversal event occurs, the project will meet the requirements of the standard under which it is registered, including any applicable accountability measures. All transactions will be ex-post.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Project not yet issued.	The project's durability will meet the requirements of the standard under which the project is registered.	Project not yet registered.
Lash Dairy	Project is under development; standard registration pending	Project is under development; methodology selection pending.	Agriculture Methane	Washington, United States	Project is under development; timeline is pending.	Project is under development; start date is pending.	Project is under development; quantity of reductions and removals generated is pending.	Avoidance	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Emissions reductions from this project are permanent and are not subject to reversal risk. All transactions are ex-post.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Marketing project, no saleable vintage in inventory.	Permanent	Project not yet registered.
Northeast Biochar	Project is under development; standard registration pending	Project is under development; methodology selection pending.	Biochar	Maine, United States	Project is under development; timeline is pending.	Project is under development; start date is pending.	Project is under development; quantity of reductions and removals generated is pending.	Removals	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Project will be subject to the accountability requirements of the standard under which it's registered.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Project not yet issued.	The project's durability will meet the requirements of the standard under which the project is registered.	Project not yet registered.
South Texas Community Clean Up Biochar	Climate Action Reserve	U.S. & Canada Biochar Protocol, Version 1.0	Biochar	Texas, United States	Project is under development; timeline is pending.	Project is under development; start date is pending.	Please reference the project's registry page and the project's Offset Project Data Reports for historical annual issuances.	Removals	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Details on project durability, permanence monitoring, and end uses can be found in the U.S. and Canada Biochar Protocol, available here . Biochar is credited based on the relative amount of carbon that remains sequestered over a 100-year period. Only those end uses for which there are reasonably high assurances that the biochar will not experience a reversal event during the project term are eligible under the Protocol. All transactions will be ex-post. For additional information, please reference the protocol and the project's registry page.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Project not yet issued.	In accordance with the Program Manual, project owners must monitor and verify projects for a period of 100 years following the issuance of credits.	Project not yet registered.
Southwest Biochar	Project is under development; standard registration pending	Project is under development; methodology selection pending.	Biochar	Arizona, United States	Project is under development; timeline is pending.	Project is under development; start date is pending.	Project is under development; quantity of reductions and removals generated is pending.	Removals	All credits sold and marketed by 3Degrees are or will be validated and verified by an independent third-party.	Project will be subject to the accountability requirements of the standard under which it's registered.	Credits have not yet been issued. All emission reductions and/or removals will be calculated in accordance with the selected Protocol.	Project not yet issued.	The project's durability will meet the requirements of the standard under which the project is registered.	Project not yet registered.
