

# Carbon Credit & Renewable Thermal Certificate Supply

*Easily source high quality carbon credits and renewable thermal certificates with low risk*

Residential and commercial utility customers are increasingly looking for ways to address their environmental impact, and participating in a voluntary carbon credit and/or Renewable Thermal Certificate (RTC) program is a great way to do just that. Procuring the supply for this type of program can be a time-intensive process that comes with a lot of risk, but 3Degrees can make it seamless for you. Our strategy is based on two simple principles: keep risk extremely low and deliver the highest-quality product possible.

## OUR SERVICES

### CUSTOMIZED CARBON CREDIT & RTC SOLUTIONS

We'll work with you to develop a product sourced from carbon credit and renewable natural gas projects that are impactful to you and your customers — balancing cost, project type, geography, and co-benefits like habitat preservation or reduced air pollution.

### RISK MANAGEMENT

When you choose 3Degrees to supply your voluntary program, we take risk management out of your hands. We offer multi-year agreements so you can have consistent supply pricing and quality, and we cover the risk associated with fluctuations in program participation and changes in the carbon credit and RTC market.

## By the numbers

**20.9M+**  
carbon credits  
delivered to clients

**4,000,000+**  
MMBtu of short- and long-  
term RTC sales executed  
for both corporate and  
utility clients

**50+**  
new U.S. carbon credit  
projects co-launched  
since 2004

## THE 3DEGREES ADVANTAGE

### QUALITY AND INTEGRITY

We apply a strict due diligence process when analyzing new carbon credit and RTC project opportunities and work closely with the standards and reporting bodies to ensure that our products align with evolving standards.

### MARKETING CLAIMS EXPERTISE

In the ever changing world of environmental claims, we stay up to date on all relevant marketing guidelines (Green-e® claims guidance, FTC Green Guides, Greenhouse Gas Protocol, etc), and can advise on appropriate claims.

### FRICTIONLESS CONTRACTING AND DELIVERY

3Degrees provides customers with an easy and efficient contracting and data management process. Our proprietary carbon credit and RTC portfolio management tool enables us to audit every purchase, manage all current and future obligations, and closely monitor performance and market price signals.

*All carbon credits in our portfolio are listed in one of the following standards bodies:*

CLIMATE  
ACTION  
RESERVE

**Gold Standard®**

Verified Carbon  
Standard  
A VERRA STANDARD

*We track all RTCs in the  
M-RETS Renewable Thermal  
tracking system for  
third party assurance*
