

Renewable Energy Certificate Supply

Source high quality renewable energy certificates easily and with low risk

Offering renewable energy programs increases customer satisfaction and empowers utility customers to reduce their impact. 3Degrees can seamlessly source Renewable Energy Certificate (REC) supply for your program, managing the volumetric risk and ensuring a high quality product that meets your needs.

OUR SERVICES

CUSTOMIZED REC PROCUREMENT

We work with each utility to develop a REC product sourced from renewable energy projects that matter to you and your customers — balancing cost, technology, and geography.

RISK MANAGEMENT

When you choose 3Degrees to supply your voluntary program, we take risk management out of your hands. We offer multi-year agreements so you can have consistent supply pricing and quality, and we mitigate the risk associated with fluctuations in program participants' electricity usage and the volatility in REC prices.

GREEN-E® AUDITS

When all REC supply is sourced directly through 3Degrees, we provide complimentary Green-e® audit services. Our highly experienced team will manage the process from start to finish, greatly reducing the time and resources needed from your team.

THE 3DEGREES ADVANTAGE

MARKET INTELLIGENCE

We meticulously track market data nationwide, both in compliance and voluntary markets. Our historical knowledge of buyers and sellers throughout the country ensures that we are always ready to act opportunistically to benefit our partners. We are always available to meet to discuss supply questions, market dynamics, and more.

QUALITY AND INTEGRITY

Our robust origination and contracting processes, proprietary contract management database, and expertise in working with a wide variety of REC tracking systems help us ensure the quality and integrity of the products we deliver.

SUPPLIER RELATIONSHIPS

We have spent years cultivating relationships that enable us to stay up-to-date on the industry and maintain the pulse of market movements across the nation. This gives us the first opportunity to buy new or highly marketable projects and equips us with the trust necessary to negotiate terms that protect our partners and insulate us from risk.
